

Q.1) What is Neutralisation reaction? Give two examples.

Ans → Neutralisation Reaction: "Acids and alkalies react to each other forming salt and water and neutralise each other."

Example:

Here, CO is oxidised and Fe_2O_3 is reduced.

Q.2) Give two important uses of washing soda and baking soda.

Ans → Uses of washing soda: 1) Used in glass, soap and paper industries.

2) It is used in houses for washing purposes.

3)

Uses of baking soda: 1) It is usually used in making baking powder used in bakeries.

2) It is used as an antacid to neutralise

acidity in the stomach.

Q.3) What do you mean by acid-base indicators?

Ans) Acid - base or Acid - alkali indicators:
"The natural or synthetic chemicals which indicate the presence of acids and bases (alkali) are called acid-base or acidalkali indicators."

Q.4) What are strong and weak acids?
In the following list of acids, separate strong acids from weak acids.

Ans) Hydrochloric acid, citric acid, acetic acid, nitric acid, formic acid, sulphuric.

Strong acid $\Rightarrow$ "Those acids which ionise completely in aqueous solutions and provide hydronium ions (H_3O^+) in a large number, are called strong acids".

Ex. of Strong acids: Hydrochloric acid, nitric acid and sulphuric acid.

Weak acids $\Rightarrow$ "Those acids which are partially ionized in aqueous solution and provide hydronium ions (H_3O^+) in less number, are called weak acids."

Ex. of Weak acids: Citric acid, acetic acid and formic acid.

Q.5) Write any four uses of plaster of paris.

Ans.) The uses of plaster of paris:

- 1) In making plaster to mend bones.
- 2) In making casts of teeth in dentistry.
- 3) In making decorative designs.
- 4) In making toys, chalk, statues, etc.

Q.6) Write two uses of each of the following

i) Baking soda ii) Bleaching.

Ans.) i) Uses of baking soda powder,
Uses of bleaching powder.

ii) Plaster of Paris.

iii) Washing soda.

1) As an Antacid.

2) In bakery production.

ii) Uses of Bleaching powder:

1) For bleaching clothes and papers.

2) As an insecticide.

iii) Uses of Plaster of Paris:

1) In making plaster to mend bones.

2) In making toys, statues, chalk, etc.

iv) Uses of Washing Soda:

1) For washing and cleaning.
